The above performance reflects that of the underlying portfolio, up to April 2011 and from then on the performance of Fortress International Fund LFP Prime SICAV-SIF S.A.

Fund Strategy

The Fortress International Fund LFP Prime SICAV-SIF S.A. strategy is to invest through a tax efficient structure in portfolios that carefully select US life insurance policies that are beyond the contestability period. The Fund seeks to build a large diversified portfolio across numerous sectors including, but not limited to, carrier concentration, expected maturities, gender, age, medical impairment, geography and face value size. In order to properly implement a buy and hold strategy the Fund seeks to isolate mortality risk in order to build a large sample size. Since policies are held through to maturity the managers employ extremely detailed actuarial and financial analysis. This ensures that policies purchased are accounted for longevity risk as well as other variables of the statistical profile. Policies are marked to market on a quarterly basis to portray an accurate view of the market value of assets.

Fund Facts

- Investment performance is minimally correlated to traditional financial markets.
- The Fund is well diversified across a number of policies, insureds, impairments and US insurance companies.
- The Fund's net asset value is recalculated monthly using a mark to market valuation system.
- The Fund is completely tax compliant and the assets are not liable for US withholding tax.
- Life Settlements provide an optimum opportunity to diversify your investment portfolio.
- Regulated Fund Structure that offers proper financial supervision.
- Complete transparency.
- Regulated service providers, including Custodian Bank, Administrator, Tax Adviser and Auditor.
